SALE \$607.00

Highlights:

- Perfect for outdoor use
- Comes with lid & liner
- Durable, textured polyethylene coat
- Surface and in-ground mounts sold separately

Capacity: 32 gallon

Tidy up your area with the low-maintenance UltraLeisure Standard Trash Receptacle. A textured polyethylene coat produces an incredibly robust and scratch-resistant finish. It also creates a UV stabilized surface that resists color fading when sitting out in the sun. The entire process creates a durable finish to generate a low-maintenance receptacle that looks like new even after years of utilization. This makes it ideal for outdoor facilities including parks, city sidewalks, or any public area. This compact bin can be placed in small spaces or it can be combined with several others to cover a large, open field. The see-through design of this 32-gallon capacity waste bin allows workers to recognize when the trash is full and needs to be emptied, further facilitating upkeep. This unit comes with a lid and liner. Surface and in-ground mounts are sold separately. Talk to a representative for more information.
