Give parents peace of mind as they introduce their young children to the playground swing set for the very first time! Our Individual PVC Coated Metal Swing Set Chain is designed to provide a safe and comfortable ride for young children, while also providing an aesthetically pleasing pop of bright color to your play area. The chains are designed specifically for use with our Elite Series bucket seats. The PVC coating keeps little fingers safe from pinches, while also providing a smooth, secure grip on all 48" of length. Made of durable and rust-resistant galvanized steel, and dipped in PVC coating for safety and comfort, these commercial-grade playground swing set chains are designed to withstand the elements and are made to last. Perfect for replacing or upgrading existing swing chain, coated chains easily connect to single or double clevis shackles. Get creative and color-coordinate with one of four available colors: Blue, Green, Yellow or Red.
